

Flex-Run with Nike Sole

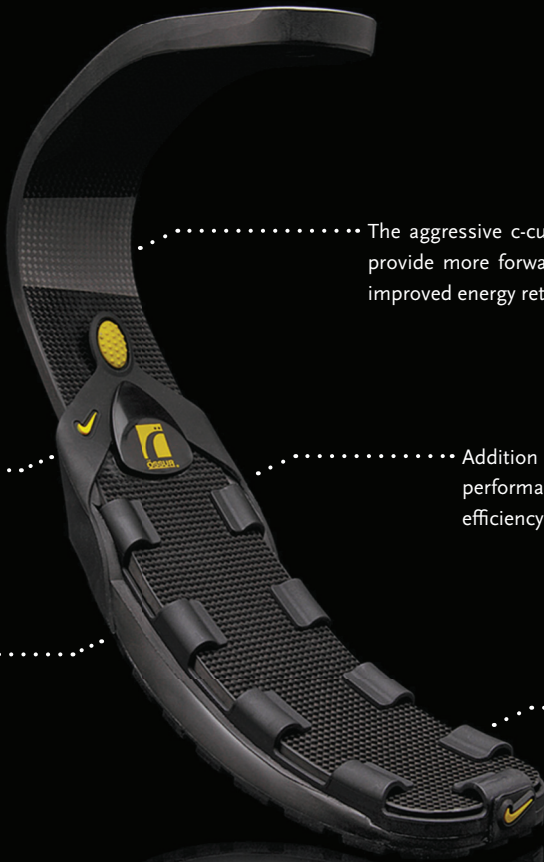

For more than two decades, the Össur Flex-Run™ has enabled amputees of all abilities to achieve their athletic goals. Now the new Össur Flex-Run with Nike Sole elevates the original and undisputed leader in distance running feet to the next level. Leveraging Össur's unmatched research and development in running prosthetics and Nike's world-renowned traction and sole technologies, the Össur Flex-Run with Nike Sole combines an improved Flex-Run design with the first running sole of its kind.

Made of proprietary carbon composite technology.

The aggressive c-curve is designed to provide more forward propulsion and improved energy return.

The removable Nike Sole slides easily on and off the foot.

Addition of the Nike Sole helps enhance performance for the user, while improving efficiency and results for the prosthetist.

During the design phase, special attention was paid to the midsole resulting in a more natural rollover.

Increased toe length enables more powerful push-off.
