LP ROTATE™ WITH EVO™

The LP Rotate with EVO has been specially designed for people with long residual limbs, which have insufficient clearance for the Re-Flex Rotate with EVO.

This compact energy-storing foot offers rotational shock absorption designed to reduce shear forces on the residual limb. The Rotate shock module is combined with the LP Vari-Flex foot module. Össur's EVO* feature enables the full potential of the foot plate to be realized with every step, helping to enhance natural gait progression.

*Energy Vector Optimization controls the transfer of ground reaction forces to the prosthetic foot. Each step is optimized for maximum efficiency, helping to reduce fatigue and pressure on the sound side.

USER INFORMATION	
Amputation Level:	Transfemoral and Transtibial
Impact Level:	Low to High
Maximum Patient Weight:	147kg (324lbs)

FOOT INFORMATION	
Categories:	1-8
Sizes:	22-30
Weight of Foot: (Size 27)	870g (30.7oz) w/ Pyramid and Foot Cover
Build Height: (Size 27)	149mm (5 7/8") w/ Pyramid and Foot Cover
Heel Height:	10mm (3/8")
Adapter Options:	Male and Female Pyramids
